He might, with the greatest ease and safety, under the then existing circumstances, have run the boat into one of the numerous creeks which abound in the Canton Rivers, given £2000 to the mandarin, £2000 to the underlings, and have kept the £10.000 for himself. He, however, acted faithfully, and alone brought all this treasure safely through. He had, at this time, £2 per month. When I took the management of the bank in Hongkong, in 1858, his wages had been

The year 1880 has not been so marked as the one previous for the completion of many public works in this Colony. There has been however considerable progress made in the erection of new dwelling houses and other buildings. The most important work on hand is the reclamation scheme of Teluk Ayer. - Already 700 feet of the sea during his journey across. China to wall have been constructed, and about Burma, has communicated through that 200,000 cubic yards earth have been filled in. At the rate the work is at present being done, the public may expect to see the whole completed in about three years from this time, but the road to Tanjong Pagar connecting it with Teluk Ayer street may be finished in a much shorter period. It is difficult to estimate the importance of this great public work, both as regards Tanjong Pagar Docks and district, and also to the town generally. It is expected that the sale of land reclaimed will cover the cost of the work, but whother it does or not, there is no doubt that the Municipality will be gainers in various ways and the appearance of the town will be greatly improved. The Master-Attendant's and Shipping Office will improve the appearance of Fort Fullertion, and when finished will be a great convenience to the Mercantile Community. It will probably be completed | Si was reached at Wu-Chou-Fu (Ouduring this year. Coming nearer home. we find the ruler of Johore making an effort to assist the somewhat roughly used planters in his territory. A railway from Tanjong Putri to the fort of Gunong Pullai is under consideration, and a good cart road is being projected between Kota Tingie the old Capital of Johore and Gunong Pantie, which will complete the connection between the plantations to the Eastward with Singapore. The tapioca estates on the island appear to flourish, and increase in magnitude. That of Mr Chasserian has long been a credit to the energy and skill of that gentleman who may justly be called the pioneer of planting in Singapore. The Trafalgar estate still goes on increasing in size, and judging from the quantity and the high quality of the tapioca produced, it must give every satisfaction to the spirited proprietors. On this lantation new works, with all the latest improvements in machinery for cleaning. cooking, and preparing tapioca, driven steam power; have been lately started and are a great success in every way. Citronelle grass plantations have had a run of good markets-high prices being paid during the year for almost all essential oils. Mr Fisher's plantation has extended itself greatly, and that of Mr Schomburg, who is an enthusiastic planter, will soon be in a position to produce a high class of There are now between 400 to 500 acres in bearing, and in a couple of the stills and other plant will be in rea-

Mr Cargill has fulfilled thead duties without fear or favor and is generally believed to be the right man in the right place. Great improvement in the drainage and roads worthy of note, and it may be remarked that the Municipal board is tilled with men of judgment chosen after considerable competition. NOTES ON A JOURNEY FROM CANTON TO KWEI-YANG, FU UP THE CANTON RIVER .-

By W. Mesny. Mr Mesny, a gentleman from Jersey who has passed many years in the interior of China in the service of the Chinese Government, and who accompanied Capt. Gill from Ch'eng-Tu to Bhamo officer to the Journal of the Geographical Society at Home particulars of his voyage up the Hsi-llo or Canton river to Kwei-Yang-Fu in the province of Kwei-Chou, not before made by any

Mr. Mesny started from Canton or March 9, 1879, in a native junk, ascending the west river past Fu-Shan (the Fat-Shan' of W. & A. K. Jolinston' map), and entering the main Hsi-tle (Si-Klang of Johnston) at San-Shui-Hsien. Here the viver is 200 yards wide, and deep enough for steamers of 1,000 tons: its banks are fertile and wellcultivated. After passing Shao-Shing-Fu (Chow-King), the froster of Kuanghow), on the junction of the Fu-Ho and Hsi-lio. This city is the centre of con iderable import and export trade, and visited for commercial purposes by the oboriginal Minu-Tze from Kwei-Chow, with strange costumes and in comprehensible tongue, who are looked on with contempt by the people of the great central nation. Even now there are here stores for foreign goods whith have managed to pass the Lekin or octroi barriers so numerous between Canton and Wu-Chou-Fu. These barriers afford little benefit to the revenue, being used by greedy officials as a means of extortion; and they bripple trade by increasing the cost of articles in -proportion to the distance of carriage. Wu-Chou-Fu may, however, yet become good treaty port for Knang-Si, Kwei-Chou, and some parts of Ilu-Nan and Yun-Nan, as light draught steamers for towing purposes could come up with curgoes all the year round. Mr Mesny met with civil treatment from the prople, though the magistrate endeavoured keep him away by attempting to excite

After a journey of twenty-one days up the Fu-Ho (Kwei-Fong or Cassia), traveller rouched Kwei-Lin-Fu (Kuei-Ling), the previncial capital of Kunng-Si, on June 28. This river is not likely to be used for steam traffic owing to its shallow rapids. The cities on it are ruinous, and occupied chiefly by newcomers. Rice and other cereals, and sugar cane, are pruch cultivated, and the country above Ping-Lo-Fu is very picturesque, the hills sometimes having large caves which pierce them, showing the sky through. The people are greater flesh-enters than those of other provinces, and the women do not as a rule cramp

their feet After a stay of a week. Mr Mesny reached the Pei-Sha-Kiang, having crossed a plateau by water with an ascent of eight and descent of fifteen locks. There was again struck, near Liu Chou-Fu (Lico-Chow), now yery quiet and partly in ruins. The width, depth, and slight current of the river appear to favour steam navigation, and though the branch starting near Yun-Nan-Fu is much the longer, this one is considered the principal by the Chinese, who give the prea terence to the one having the greater be number of junks. Trade therefore was probably more prosperous here in former days. Ascending the river to Liu-Cheng-Hsien (Live-Chin), where it again forka east and west, the traveller chose the Yung-Your eastern branch, reaching Yung-Hsien on the fitch day from Liu-Campbell, who has taken a great interest in Chou-Fu. This is a flourishing city, and hive dollars. would make a first-rate terminus for steam navigation from Hongkong, Still ascending the Yung river, the shallows and rapids of which began to obstruct navigation, Ku-Chou-Ting, an important frontier city of Kwei-Chon, was reached in ten days, the country traversed being inhabited by a peculiar tribe o Miau-Tze called Tung-Kia, subsisting principally on a very glutinous kind of rice called No-Mi, and living in twostorved houses, of which the lower stores is occupied by cattle, and the upper is

almost destitute of furniture. - At Ku-Chon-Ting, the smallest boats obtainable had to be used, and in eight reached at Sun-Kic, or ai-Mino-Chou, as it is called officially. An overland journey of eight days brought the traveller to Kwei-Yang-Fu, entirely through the country of the Miao-Tze. who are gradually being displaced by Chinese unmigrants, who follow the water-way and natives further back into the country. CHRISTMAS DAY-DREAMS

BY ARTHUR GODDARD. Dreaming by my Christmas fire. As the flames leap high and higher : Dreaming of a time long past. Time too honey-sweet to last; Dreaming of the days gone by: Watching, with a feeble eye. Dim with mist of many years, Blurred with mist of many tears Fifty years have stolen away Since my happy wedding day; Yet-I see myself once more In the very dross I wore; People whispered soft aside: Blessings on the fair young bride; I may say it without shame, I, a seventy-year-old dame. Rising, falling of the blaze, Till from out the lurid haze Looms a girl with sunny hair, Cheeks with rose and lily fair: Robed in softest, purest white Of a style forgotten quite; But I know it well, ah me 'Tis my long dead self I see, It is fifty years ago-Sunny hair as white as snow "I have lived too long," I've said I have mourned so many dead ; Husband, children, all are gone, Christmas finds me here-alone Still I trust, my sins forgiven To meet them all, ere long, in heaven

THE LADY'S CHOICE She stood, in clouds of fleecy white, Within the closely-curtained room The frost-fire of her diamonds bright Illumining the twilight gloom. And in her hand, flushed hotly there. Rich clustering flowers, red and sweet, Vhile woodland lilies, pure and fair, Lay all unheoled at her feet.

She read the dainty, perfumed note, "Oh, Queen, I love you more than all The great, wide world ! and so," he wrote. "This evening, darling, at the ball, If I may hope to claim your hand, Then wear those flowers." In the room She mused, while visions bright and grand Rose mingling with the flowers' perfume.

for, looking down the future years. She thought of all the joys of gold, How wealth would banish care and tears-Then suddenly her heart grew cold. She loved him not. And long ago A voice had whispered words more sweet. She turned, and saw the firelight glow On woodland lilies at her feet.

and there another message found : "Sweetheart, the poor, I love you well!" She took the flowers from the ground, While one bright crystal tear-drop fell). Then wear these blossoms in your breast. To-night, if I may call you mine." Now closer are the lilies prest, And at her feet red roses shine.

The music fills the gilded hall. The soft light throws a silvery sheen O'er festive revelors-midst them all. One beauteens woman reigns as queen. The blossoms in her laces thrill A lover's heart—he wins a wife! And woodland lilies' perfume still Shall sweeten all their future life !

Many of the jokes he made were not so good as. this, but, no doubt, served to amuse himself and others. An acquaintance told me that he was once riding in a Broadway omnibus when Browne got in, and, on being asked for his fare, inquired of the driver if he could change five dollars. The driver said he could not, stopped the coach, and requested Ward to get out. Upon this Ward became indiguant. Why should he get out? Because he had not the proper fare. "But have," he said; "I never said I hadn't ten cents. I only asked if you could change

THE HISTORY OF JAPAN.* From an interesting review of Sir Edward J. Reed's "History of Japan, published in the Scotsman, we take the following extracts :-

It is barely twenty years, since the first rent was made in the veil of mystery with which, by dint of their policy of jealous conclusion, the rulers of Japan had surrounded their island-empire for striking evidence can be furnished of the rapidity of the march of events in these days than by a glance at the changes The views he expresses on this subject of manly power with feminine delicacy which have been wrought within those two decades in the "Land of the Rising Sun." During that space of time-so inconsiderable in the life of a nationgreater reforms, political and social, have been accomplished among the Japanese than the struggles and the development of a thousand years have produced among ourselves. A feudal system which was ancient when William the Norman first set foot on English soil has been absolutely swept out of existence. An Imperial rule which, though dating back to a period anterior to the birth of Christ, had for many centuries been nothing more than a name, has been revived, and now exists in such life and vigour as it never before possessed. Reamong a people to whom the idea of self-government had remained absolutely unknown during a national life of up being planted wholesale in a country whose inhabitants had been taught to such as were drawn by men, were practically unknown. Now, the country while the construction of about 500 more is contemplated; there is a telegraph system of some thousands of miles, and a postal service superior to those of many European countries: A police force on the English model, an army drilled and disciplined by French officers, a navy composed chiefly of ironclad or ironbelted steamships, have replaced the twosworded followers of the feudal nobility, the junks and sampans that represented the military and naval power of Japan even as recently as in 1870.

"Yes," said the professor, "or rather element fire. In its positive state its same as we find it in the Chinese books?

"But," I said, "the atomic theory is of the elements to be composed of a certain number of atoms."

"Certainly not," replied the professor, the theory is as old as Pythagoras; but, Itegistration, what proves the ancient Chinese to have been early in possession of the knowledge of chemical analysis is the fact that they recognise each of the elements to exist in two different states—the positive and negative. Even to this day modern chemists can show only oxygen and some elements in that group to exist in the two allotropic states; but it is a most probable hypothesis in modern chemistry that all elements must exist in the two states, positive and negative; only,it has

not yet lieen possible to exhibit it." "Men of science," I here remarked, " ought then to study the Chinese classics

"Exactly," continued the professor, without paying attention to my interruption, "the figures attached to the elements which we find in the Ohinese books might give us a clue to the allotropic states of the other elements hitherto known as non-allotropic."

"But what about the sea sickness?" said a young diplomate, who did not understand what allotropic meant, and therefore could not follow the learned professor's discourse,

"Or how to avoid getting drunk?" said the elderly military gentleman. "Now you must know," said the professor, "the human body like the mate. rial universe is composed of the same five elements. Trade Mark-PHOSPHODYNE. DISCOVERED AND SO NAMED, A.D. 1862,

BY R.D. LALOR, M. D. DR. LALOR'S PHOSPHODYNE is a Pare Solution of PROSPHOROUS in combination with the Vegetable Alkaloids Quinim, Cypripedin, Kanthoxylin, &c., prepared by a Chemical process *known only to DR. LALOR, producing a remarkably Elegant and Pleasant Tasled Preparation, equal to the best Wines, Prefectly free from Strychnia and all other Dangerously Active Drugs; superseding the numerous objectionable forms of Phosphorous Pills, Pilales, Oils, and other Nauscon Mixtures with which the Market has been flooded since the Phosphore Treatment of Disease was first made Public by DR. R. D. LALOR, in 1862.

o Residents in India, China, and the Colonies, it will prove invaluable as a RELIABLE Liver Tonic and a Vitalizing Restorative.

This Phosphetic combination, the Wonder of Modern Chemistry, is pronounced by the most eminent members of the Medical profession to be unequalled for its power in replenishing and elaborating the Vitality of the Body; by its supplying all the essential constituents of the BLOOD, BRAIN, and NERVE SUBSTANCE; and for developing all the Powers and Functions of the system to the highest degree; by its being agreeable to the palate, and innocent in its action. While retaining its wonderful properties, in the known THERAPEUTIC LOENTS of the PRESENTAGE, for the SPEEDY and PERMANENT CURE , of all derangements of the Nervous and Blood Systems, New our Prestration, General Doblity, Menta and Physical Depression, Incapacity for Study or Business, Noises in the Head and Ears, Loss of Energy and Appetite, Indigesion and Liver Complaints, Fatuleuce, Nervous Fincies, Hypochondria, Nerious Debility in all its Stages, Loss of Memory, Softening of the Brain, Paralysis, Affections of the Spinal Column, Lumbago, Scietica, Affections of the Kidneys, Bladder, Urinary Deposits, &c., Ague, Spams, Asthma, Consumption, Chronic Bronchitis, Scrofula and Skin Disease, Rickets (in children), Wasting or Withering of the Muscles, Impaired Nutrition, Impoverished Blood, Premature Decline, and all morbid conditions of the system, dependent upon the deficiency of THE VITAL FORCES, whether arising from Climate, Brain Fag, or whatever

DR. LAIOR'S PROSPHODYNE being natural Resideative, its Energising Effects are at followed by corresponding re-sition; but are PERMANENT and are frequently shown from the first day of its administration by a remarkable increase of Nervous Power, with a feeling of Vigour, Strength, and Comfort to which the patient has long been unaccustomed. DR. LALOR'S PHOSPHODYNE gives back to the Human structure in a suitable form the Phosphoris or Lively Animating element of life which has been wated, and exerts an important in-Anence directly on the BRAIN, SMNAL MARROW. PARD NERVOUS SYSTEM, of a Nufritive, Tonic, and Invigorating character; thereby checking all Wasting of the Vital Finid, and the more Exhausting Processes of Life, maintaining that Buoyant Energy of the Brain and Muscular System which renders the Miss CHEERFUL. HAPPY, BULLIANT, and ENERGIFIC; entirely overcoming that Dall, Inactive and Sluggish disposition which many persons esperience in all their actions. A Marvellous Easterstive for Besin Toilers, Clergymen, Business Men, and all who are engaged in the Competitive Strug-

PHOSPHODYNE, the Antidote for Climatic Disease. The Remedial properties of DR. ALALOR'S PHOSPHODYNE mive spread its fame throughout every Nation and Country in the World, the natural outcome of which is that the sale has now become enumous in India. China, Africa, and other Hot Climates. This increased demand is attributable to the fact of its possessing in the most perfectly assimilable form the essential Vitalising properties PHOSPHORUS, which reminates the Ex hausted functions of Life when impaired by Heat or other causes. A very large number of Testimonials from all parts of the World freely offered from Distinguished Families, Private Persons, Military, Naval, Scientific and Professional Men who are well known, speak of it marvellou powers in Nervous Debility, WANY OF STAMINA, FEVERS, MALARIOUS DIS BASES, and as a LIVER TONIO.

PUBLIC NOTICE AND WARNING .- To Medicine Vendors and the Public in Great Britain, India, China, and the Colonies .- DR. LALOR'S PHOSPHODYNE is the onl Medicine bearing the name PROSPHODYNI that has the Sanction of the British Governmen and for which Her Majesty's Registrar of "Trade Marks "his granted Certificates to DR. Dysentery, Cholera, Fever, Ague, Coughs, Colds, &c.

Da. J. COLLIS BROWNE'S CHLORODYNE

(Ex Army Med. Staff) IS THE ORIGINAL AND ONLY

GENUINE. CAUTION. - Vice-Chancellor Sir W. P. Wood stated that Dr. Collis Browne was undoubtedly the Inventor of Oblorodyne, that the story of the Defendant, Freeman, being the Inventor was deliberately untrue; which he regretted had been sworn to. Eminent Hospital Physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's. - See Times, July 12, 1864. The public, therefore, are cautioned against using any other than Dr. J. Collis BROWNE'S CHLORODYNE.

BEMEDIAL USES AND ACTION. This invaluable remedy produces quiet,refreshing sleep, relieves pain, calma the system, restores the deranged functions, and stimulates healthy action of the secre tions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to ita marvellous good effects and wonderful oures, while medical men extol its virtues most exten-

CHLORODYNE is admitted by the profesalon to be the most wonderful and valuable remedy ever discovered. CHLORODYNE is the best remedy known for

coughe, consumption, bronchitis, asthma. CRLOBODYNE effectually checks and arrests those too often fatal diseasesdiphtheria, fever, croup, ague. UHLORODYSE acts like a charm in diarrhos, and is the only specific in cholera

and dysentery. CHLOBODYNE effectually outs short all attacks of epilepsy, hysteris, palpitations OHLORODYNE is the only pallistive in neuralgia, rheumatism, gout, cancer, toothsole, meningitis, &c.

EXTRACTS FROM MEDICAL TOPINIONS. The Right Hon. Karl Russell communicated to the College of Physicians and J. T. Divenport that he had received information to the effect that the only remedy of any service in Cholers was Chlorodyne.-

See Lancet, Dec. 31, 1864. From A. Montgomery, Esq., late Inspector of Hospitals. Bombay :- "Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly one my restoration to health, after eighteen months' severe suffering, and when other

remedies had failed." Dr. Lowe. Medical Missionary in India, reports (December 1865) that in nearly every case of Cholera in which Dr. J. COLLIS BROWNE'S CHLORODYNE was administered,

the patient recovered. Extract from the General Board of Health, London, as to its efficacy in Cholera. -" So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

See leading article, Pharmaceutical Journol, August I, 1869, which states that Dr. J. Collis Browne was the inventor of Chloropreparation when Chlorodyne is ordered. THE CHINA REVIEW.

THE widely-expressed regret at the dis-China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHIMA REVIEW, or Notes and

Queries on the Far East, is issued at intervals of two months, each number con-taining about 60 octavo pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such extra matter.

The subscription is fixed at \$6,50 postage paid, per annum, payable by non-residents in Hongkong haif-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East." generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Original contributions in Chinese, Latin, French, German, Spanish, Italian or Porfuguese, are admissible. Endeavours are made to present a resumé in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which though asking for information, furnish new or unpublished details concerning the matter in band. It is desirable to make the Queries proper as brief and as much to the point as possible.

department,

The China Review for July and August, 1875, is at hand. It says that forty-two easays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Review. Address China Review, Hongkong.-Northern

Christian Advocate (U.S.) Trübner's Oriental Record contains the following notice of the China Review :-- " This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot as in some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago has been much regretted in Europe as well as in China. The present publication, judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publigity as is now provided extremely desirable; and contributions of much interest may fairly be looked for from the members of the foreign consular services, the Uhinese Customs corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated. and who are severally represented in the first number of the Review by papers highly creditable to their respective authors. In a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both socuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predeconsor in the field, and that the China Review may receive the support necessary to insure its continuance. The publication is intend-

It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course from . the native community, amongst whom also are to be found the

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,-Australia, California, Singapore, Penang, Saigon, and other places frequented the Chinese, - consider themselves justified in guaranteeing an ultimate circulation of between 8,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

guarantors and securities necessary to

place it on a business and legal footing.

The field open to a paper of this descrip tion-conducted by native efforts, but progressive and anti-obstructive in tonein almost limitless. It on the one hand commands Chinese belief and interest while on the other deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials with Local, Shipping, and Commercial News and Advertisements.
